ENGG6400 Mobile Devices App Development

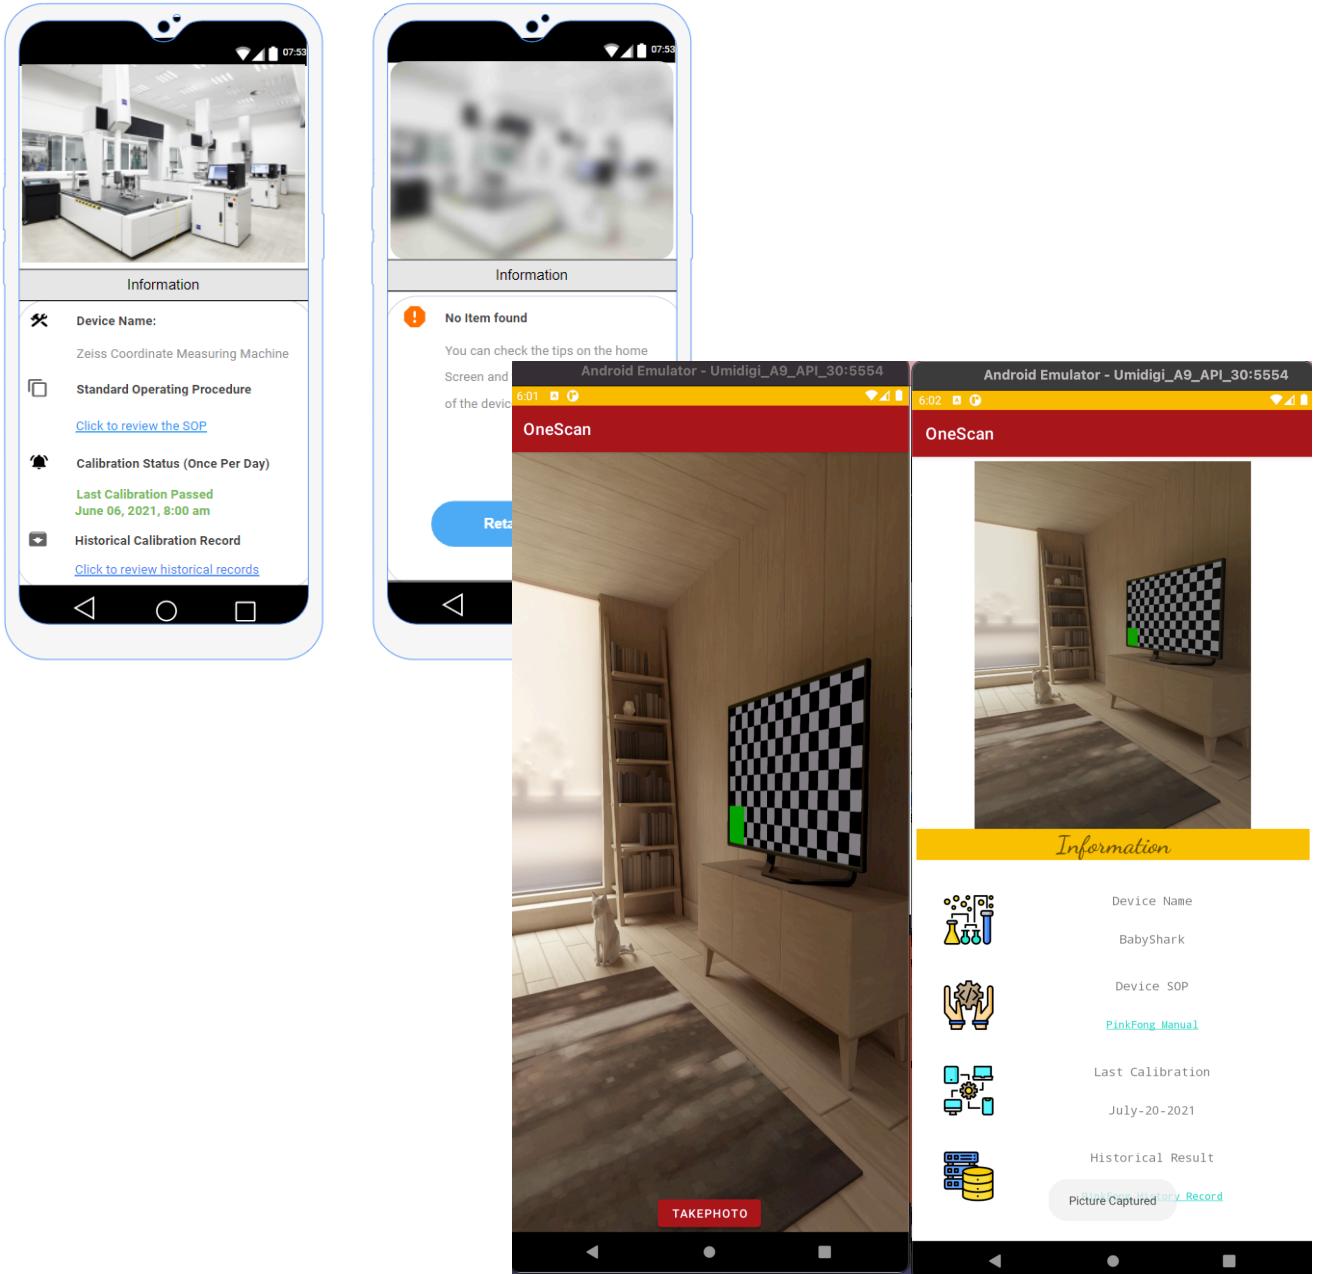

Group 5 Zimo Zhou (1189792), Yaowen Mei (1177855)

Mock-up vs Real

--- Home Screen

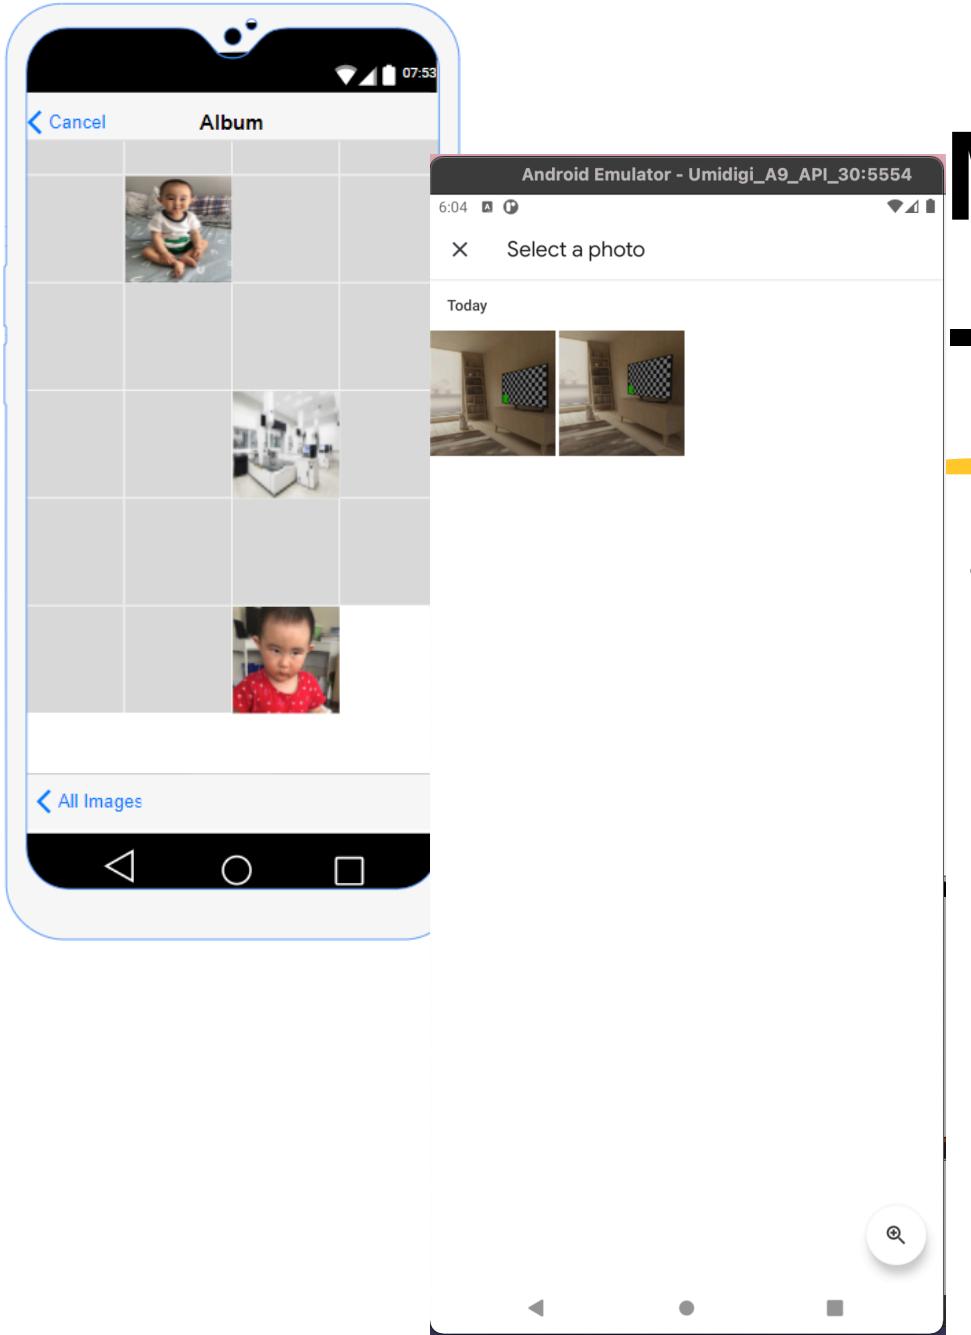

-
1. User can take a picture with this app
 2. Or choose a photo from the album
 3. Or see the instructions about how the app is going to work

Mock-up vs Real

--- 1) Take a picture

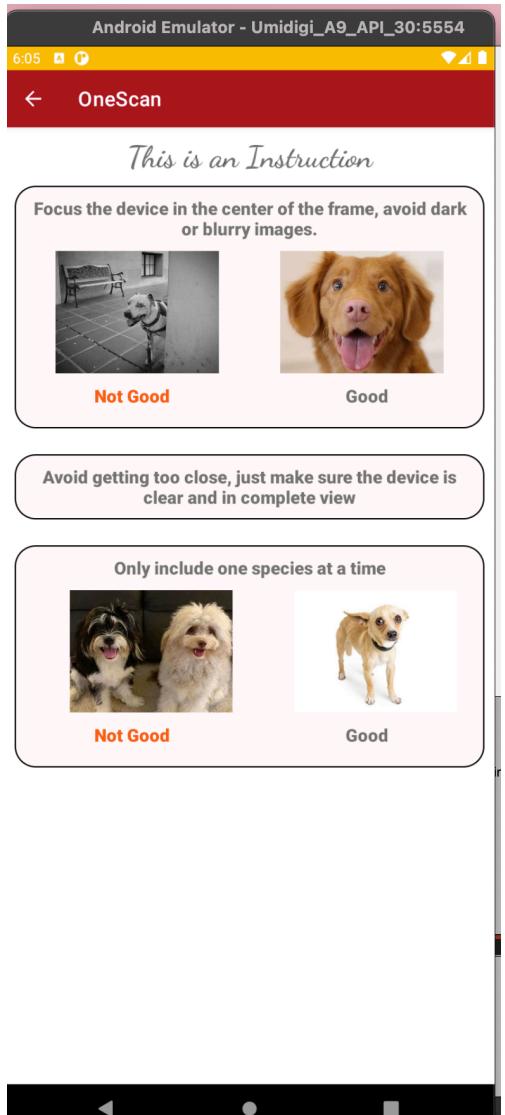

- If the device is recognized, the calibration information of this device will then be generated from the data base. **Green** for good to use, **Red** for out of calibration
- If the picture is blurry, device can not be recognized, an error message will be generated, so user can retake the picture

Mock-up vs Real

--- 2) Select from Album

- User can also take pictures from the album

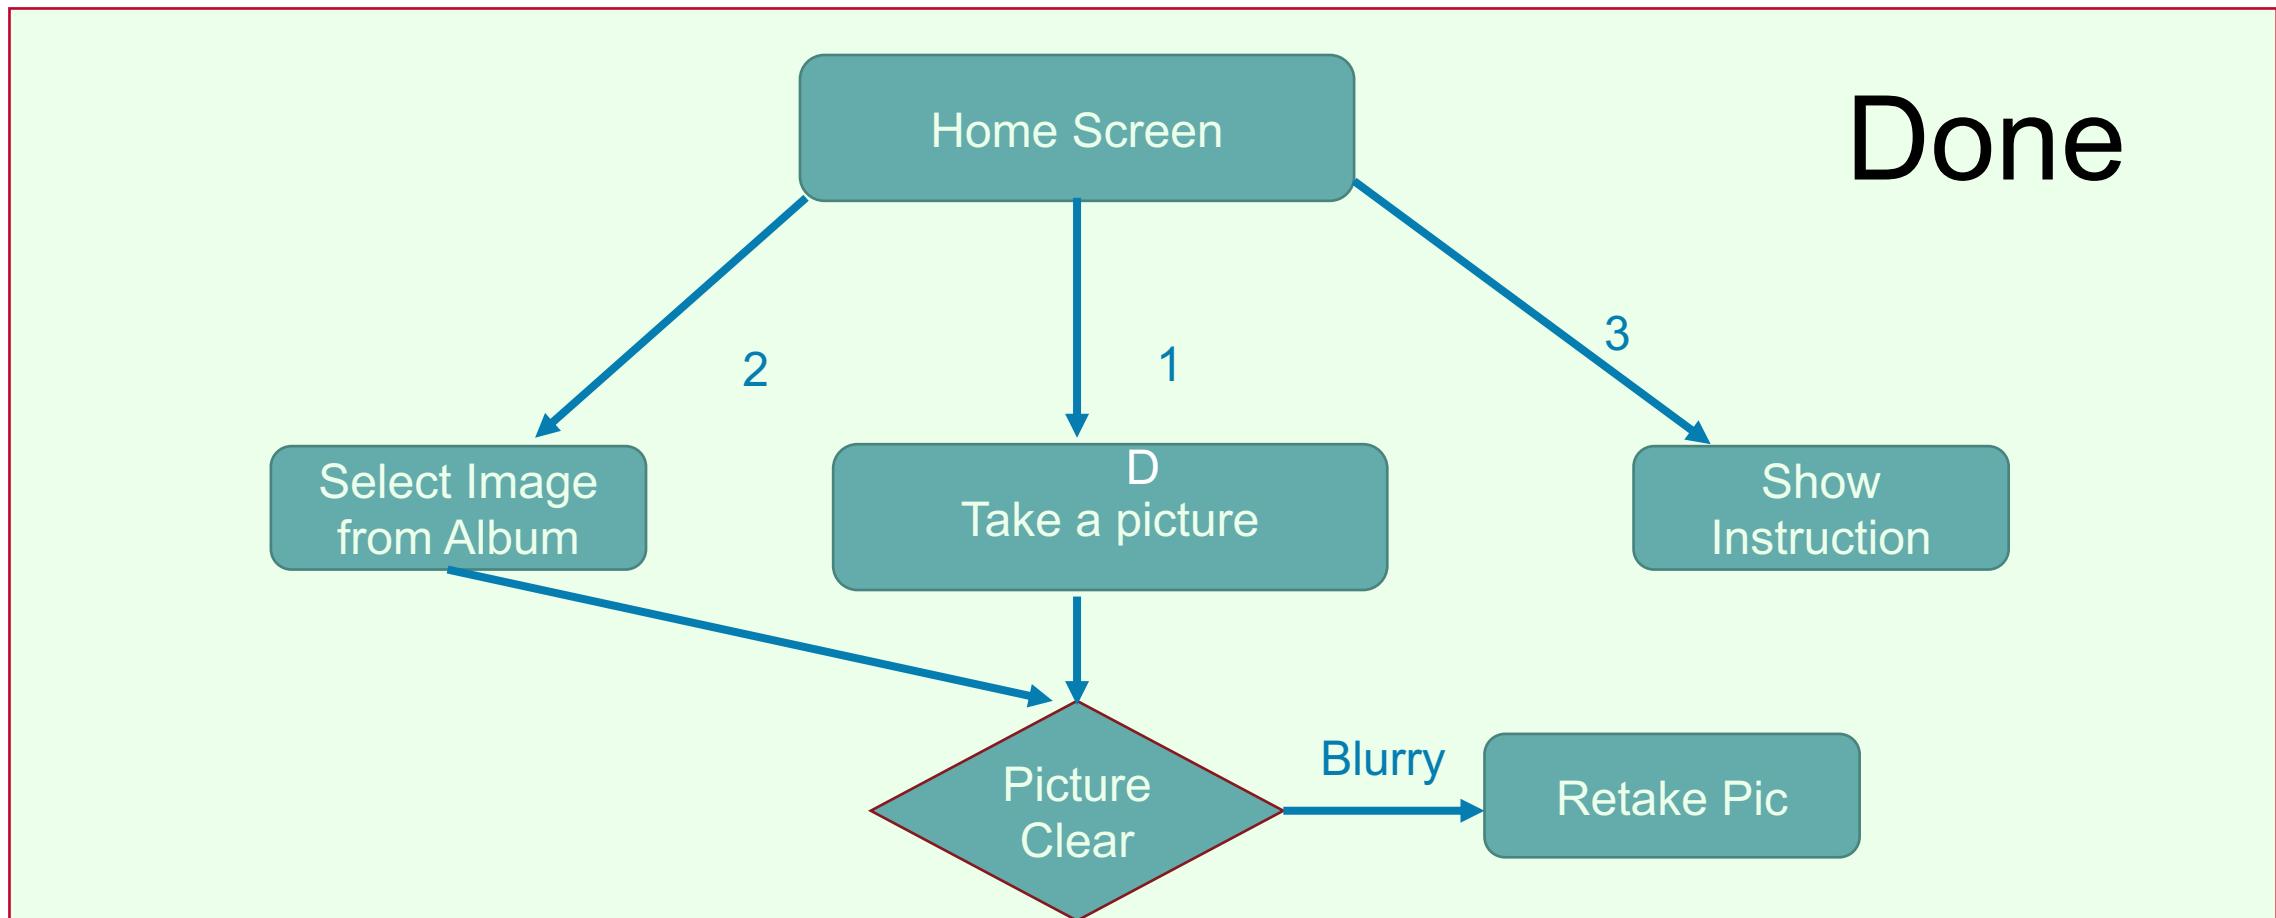

Mock-up vs Real

--- 3) Instruction

- The user should be able to use this app by intuition, but just in case, some instructions are also provided for the user:
 - Focus and put target in the center
 - Only picture one object at a time
